

Expand your Pi

Stackable expansion boards for the Raspberry Pi

Serial Pi Plus

RS232 serial communication board.
Control your Raspberry Pi over RS232
or connect to external serial
accessories.

Breakout Pi Plus

The Breakout Pi Plus is a useful
and versatile prototyping expansion
board for the Raspberry Pi

ADC Differential Pi

8 channel 18 bit analogue to digital
converter. I²C address selection
allows you to add up to 32 analogue
inputs to your Raspberry Pi.

IO Pi Plus

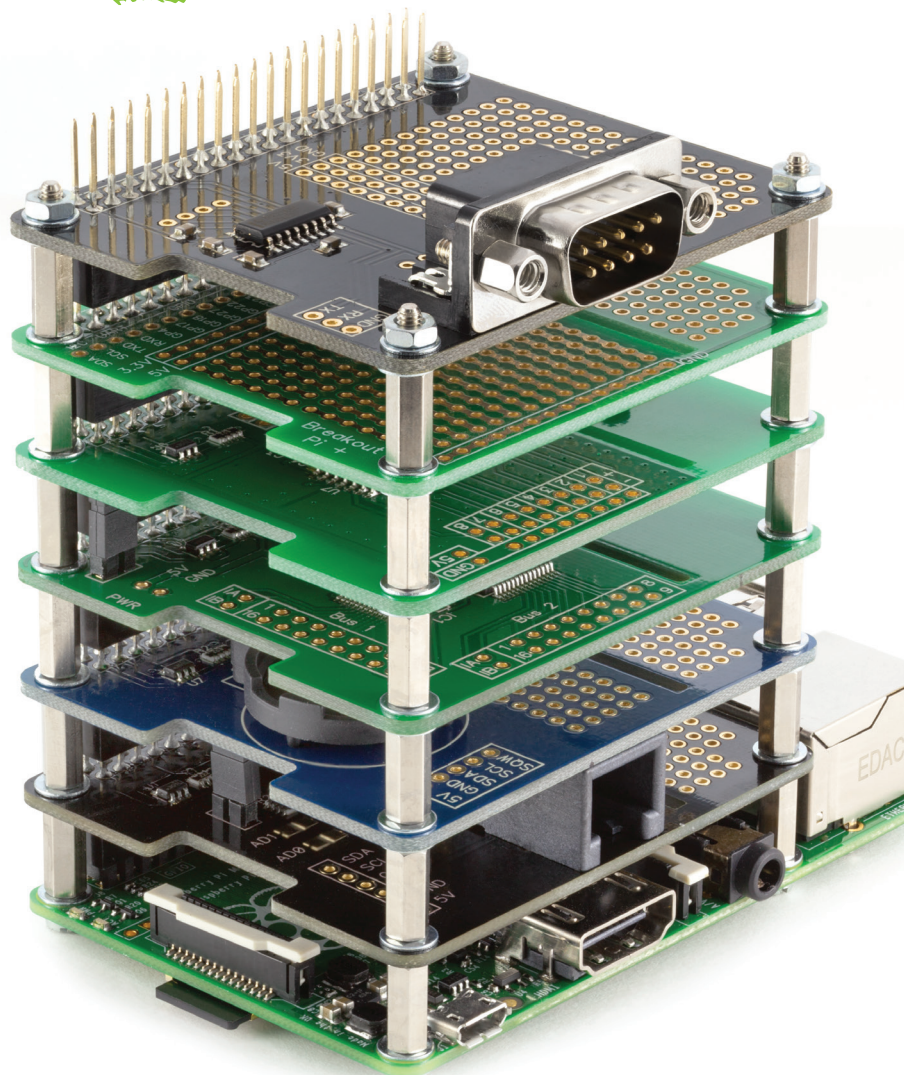

32 digital 5V inputs or outputs. I²C
address selection allows you to stack
up to 4 IO Pi Plus boards on your
Raspberry Pi giving you 128 digital
inputs or outputs.

RTC Pi Plus

Real-time clock with battery backup
and 5V I²C level converter for adding
external 5V I²C devices to your
Raspberry Pi.

1 Wire Pi Plus

1-Wire® to I²C host interface with ESD
protection diode and I²C address
selection.
